

Abdrahman Walied Nasr

Software Engineer | AI-Integrated Systems

[Portfolio](#) · [LinkedIn](#) · [GitHub](#) · +20 114 863 0739 · abdrahmanwalied11@gmail.com

SUMMARY

Backend-focused Software Developer specializing in building scalable systems and AI-integrated applications. Experienced in designing production-ready REST APIs using Node.js and Express, with a strong focus on clean architecture and security. Skilled in integrating LLMs and AI models into real-world solutions, including recommendation systems and multimodal AI pipelines. Passionate about system design, performance, and intelligent software development.

TECHNICAL SKILLS

Backend: Node.js, Express.js, REST APIs, Flask

Frontend: React, TypeScript, JavaScript (ES6+)

Databases: MongoDB (Mongoose), SQLite, Firebase

AI/ML: NumPy, Pandas, Hugging Face, YOLOv8, LLM Integration, OpenRouter API

Languages: Python, JavaScript (ES6+), TypeScript, C, C++

Tools: Git, GitHub, Docker, Linux, Postman, VS Code

Embedded: Raspberry Pi 5, Arduino, GPIO Interfaces

Core: System Design, MVC Architecture, JWT Auth, Backend Security, OOP, Design Patterns, RESTful API Design, Data Structures

PROJECTS

Personal Portfolio Website | *React · TypeScript · Vite* [GitRepo](#)

- Production-deployed portfolio with custom GitHub API hook merging live repo data with project metadata.
- EmailJS serverless contact form, IntersectionObserver active nav, deployed on Netlify with CI/CD.

AI Movie Recommendation App | *React · Node.js/Express · TMDB API · Qwen AI* [GitRepo](#)

- Full-stack system using TMDB catalog + Qwen3 via OpenRouter API for intelligent movie recommendations.
- Deployed frontend on Netlify, backend on Railway; handled AI response parsing and environment configuration.

Smart Auth System | *Node.js · Express · JWT · MongoDB · Joi* [GitRepo](#)

- Production-grade auth API: JWT access/refresh token flow, bcrypt password hashing, and role-based authorization.
- Input validation with Joi, structured error handling middleware, DB schema design, and security best practices.
- Clean MVC architecture with full test coverage using Jest; modular and production-ready codebase.

Mini AI Educational Robot | *Python · Raspberry Pi 5 · OpenRouter · YOLOv8 · SQLite*

- Lead software developer: built voice pipeline (VAD → ASR → LLM → TTS) with SQLite-backed session memory.
- Vision system with YOLOv8, face recognition, emotion detection (DeepFace), and MediaPipe gesture tracking.
- Coordinated a 11-person team and produced full technical documentation for all subsystems.

EDUCATION

Borg El Arab Technological University | B.Sc. in Industrial & Energy Technology (IT Track) | Aug 2024 – Aug 2028

GPA: 3.4 · Courses: Web Dev, Databases, IoT, CCNA, Data Structure, JAVA Programming

CERTIFICATION

AI & Machine Learning – Sprints × Microsoft (Aug 2025)

- Covered Python fundamentals, data manipulation with Pandas & NumPy, and core AI/ML concepts.
- Built a heart-disease prediction model on Google Colab achieving 86% accuracy on clinical test data.

LANGUAGES

Arabic: Native | **English:** Upper-Intermediate (B2)
